We will make use of a digital archive where known and unknown poets have read their poems aloud and pick one poem to listen to together. We will also look at and discuss one of our own poems. The only prerequisite is a love of poetry and the desire to write a poem each week!

**Subject Area:** Science/Math/Technology

**Mondays:** 5 Sessions 3:00 PM - 5:00 PM  **Start:** Mon 5/17/21  **End:** Mon 6/14/21

**Location:** Online Zoom Offering  **Class Size:** 50

**Course Description**

Apple offers users a brilliant, if not the best, camera with its iPhone, but most people who own an iPhone don't take full advantage of the capabilities of the camera app. "Photo" is the standard default mode when the iPhone Camera is opened, but this app is capable of impressive images when using the many built-in modes and tools.

In this class, which focuses on iPhone technology and not photography per se, participants will be exposed to the full set of photography capabilities within their iPhone camera and post-production editing using the features of the Photos app. They will learn about exposure and focus; photography modes beyond Photo, like Pano, Live Photos, Burst, and Portrait (on supported models); and how to enhance photographic images with camera features such as Night Mode and Filters. Participants will go on to learn how to manipulate images using the expansive set of editing tools in the Photos app. Once the capabilities within the Apple Apps have been explored, participants will be introduced to a few curated easy-to-use apps available in the App Store, that will make it possible to modify photos images in some innovative and fun ways.

For this class, participants must have an iPhone 8 Plus or later model to use during class. Earlier model phones may not have some of the capabilities that will be covered.

Location: Online Zoom Offering  Class Size: 250

Course Description
Over 2500 abused and neglected Pima County children are in foster care through no fault of their own. Too often, children are shuffled through our current system without experiencing a consistent, positive, adult relationship - someone who truly knows and understands them. Research has confirmed that just one positive adult relationship changes a child's outcome dramatically, thus providing for a brighter future. We know that every child in foster care deserves a Court Appointed Special Advocate (CASA) volunteer, but unfortunately not everyone will be lucky enough to have one. CASA Volunteers are everyday people who are doing extraordinary things to help change a child's story. In this class, participants will learn about the realities of the child welfare system and the health, safety, and resiliency of children and their families. Explore the potential of helping change a child's story!

Instructor: Angela McBride

Angie has vast experience with the CASA program. She is currently a CASA staff, was a CASA volunteer at one time, and even had a CASA as a young child. She is willing to share her story and show what a difference just one positive adult in a child's life can make.

Most landscapes are over-maintained, especially when it comes to pruning! We often waste time, money and resources when it's simply not necessary. Most pruning - even when done by landscape professionals - leaves sickly plants that look like blobs, rather than bringing out their natural beauty.

Pruning is one landscape task that when done right can save you time and money, giving you plants that are healthier, more beautiful and more resilient.

This presentation will cover:

- How NOT to prune, how to avoid having to pruning
- Why prune
- Pruning tools
- Pruning methods
- When to prune
Whether you do the pruning yourself or hire someone to assist you, knowing proper pruning techniques will help you do the pruning properly or find someone who can do it right.

Is Cohousing What You Have Been Craving Without Knowing It?

Subject Area: DIY/Self-Help

Tuesdays: Single Session  9:00 AM - 10:30 AM  Start: Tue 5/25/21  End: Tue 5/25/21
Location: Online Zoom Offering  Class Size: 250

Course Description
What is cohousing?

- It is NOT a commune. You own your home.
- It is like an old-fashioned neighborhood where members support each other.
- It is an ideal living option for seniors.
- It is most often multigenerational.
- It's like an extended family.
- You know your neighbors. Children can run around freely, and everyone knows who they are and where they live.

There are over 165 cohousing communities in the US; Tucson is fortunate to have 3. Cohousing is a community intentionally designed with ample common spaces surrounded by private homes. Common property is managed and maintained by community members. Find out more in this interactive presentation led by a current resident of Stone Curves Cohousing in Tucson.

Instructor: Maura Raffensperger

A graduate of the University of Arizona School of Pharmacy, Maura Raffensperger fell in love with Tucson and is thrilled to be back after a 40 year absence, happily living in one of Tucson's three cohousing communities. Hacks for Home/House and Hygiene Improvement & Maintenance

Subject Area: DIY/Self-Help

**Tuesdays:** 2 Sessions 1:00 PM - 2:30 PM   **Start:** Tue 6/1/21   **End:** Tue 6/8/21

**Location:** Online Zoom Offering **Class Size:** 30

Course Description
There's a lot of wisdom gained by many people gained from decades of accumulated practical experience (school of hard and soft knocks and feints). It could be about sharing simple tools and techniques of weeding, making coffee, washing dishes, shaving, etc. These are not closely guarded secrets but probably habits picked up casually, ritualized through habit, but not well known outside your household. Would be interesting to learn how someone else acquired some useful hack for life and incorporated it into their ordinary life. This is not about some grand philosophy or viewpoint about life, but simple, concrete stuff.

**Wednesdays: Single Session** 1:00 PM - 2:30 PM  **Start:** Wed 5/26/21  **End:** Wed 5/26/21

**Location:** Online Zoom Offering  **Class Size:** 250

**Course Description**

After 145 years the mystery and tragedy of Custer's Last Stand still remains. Join us as we explore the landscapes of Little Bighorn Battlefield National Monument through photographs. We will explore the same ravines and coulees upon which the 7th U.S. Cavalry fought against the mighty Lakota and Cheyenne nations as they defended their way of life. Transcending our exploration, some of those mysteries will unravel in all their hubris.

Our presenter is Bob Reece who has photographed the Little Bighorn Battlefield for more than 30 years. He has walked in its shadows of deep ravines where the vast majority of the public never gets to venture. Off-season he can be found at the battlefield telling the story of what happened on the site June 25-26, 1876 to the visiting public. He has volunteered on several archaeological surveys, and knows the excitement that comes when uncovering a battle relic last seen through dust, gunfire, and smoke amidst the screams of the wounded and dying.
Reece's photographs of this battlefield have appeared in the magazines Time, Wild West, True West, and American Heritage. In addition, his photos have graced the covers and inside of books.

And now, Mr. Reece will lead you on the journey of mystery and tragedy that is Custer's Last Stand through his photography. When you leave his presentation, you will feel like you have walked upon this battlefield.

Instructor: Bob Reece

Bob is retired, so he now can enjoy part-time work in a bookstore. His interests are in US history, military history, and Plains Indian Wars. He works off-season as a volunteer with the National Park Service at Little Bighorn Battlefield National Monument. Bob served 16 years as president of the nonprofit Friends of the Little Bighorn Battlefield (Friends), which is an official partner of the National Park Service. He still serves as a board director of Friends.

What Happened to the Promise of Nuclear Power

Subject Area: History/Current Events, Science/Math/Technology

Wednesdays: Single Session 9:00 AM - 10:30 AM    Start: Wed 6/2/21  End: Wed 6/2/21
Location: Online Zoom Offering Class Size: 250

Course Description
What Happened to Nuclear Power?

In the mid 1950's the Atomic Energy Commission chairmen stated "with nuclear power electricity generation will soon be too cheap to meter." The nuclear powered Nautilus submarine was a milestone of American technical achievement, setting records for underwater speed and distance navigation. The first land-based nuclear reactor generating electricity in Shippingport, PA went on line in 1954 and operated flawlessly for years. From 1955 through 1985 hundreds of nuclear powered electrical generating stations were built. Over 175 nuclear reactors were built to power Navy ships and 35 nuclear reactors were launched into space.

But, today we are probably witnessing the end of electricity generated by nuclear power in democratic societies. This class will explore the history, current status and probable future of nuclear power. Technical understanding of the nuclear process is far less important than understanding the general economic, safety, and most important sociological reasons why the industry is struggling.

Instructor: Gerald Geise

Gerald Geise is a Chemical Engineering graduate from Montana State University. He spent 25 years in the nuclear industry field with General Electric and United Nuclear in increasingly responsible engineering and management positions. Those include being the operations manager for Hanford, Washington nuclear reactors producing Plutonium for nuclear weapons, and the operations manager for the largest dual purpose Plutonium and electrical generation nuclear reactor. He was also president of a United Nuclear division that manufactured...
nuclear reactors for the US Navy. He also has an extensive public speaking background on the risks and benefits of nuclear power.

Situational Awareness 101

Subject Area: DIY/Self-Help, Health/Wellness

Thursdays: 2 Sessions 1:00 PM - 2:30 PM  Start: Thu 5/20/21  End: Thu 5/27/21
Location: Online Zoom Offering  Class Size: 30

Course Description
“"I didn't think it could happen to me.”
Most people understand the importance of personal safety - but they don't always know how to prevent or respond to a threat. They think of self-defense as only physical - punching, kicking, or using weapons. Those same people will also volunteer that they have no desire to get into a fight. I agree!

While punching, kicking, and weapons can certainly be effective defenses, they're not nearly as effective as avoiding the dangerous situation, to begin with!

Incidents happen in seconds. A person walking down the street listening to music on their phone is suddenly pushed over, their bags and phone were stolen. Another person searches for keys to their car only to have them snatched away in a carjacking.

Personal safety is often a matter of situational awareness - seeing, hearing, and feeling what's going on around you, so you can recognize and avoid dangerous situations!

You don't need to be paranoid in order to be aware. This seminar will help you:
- Practice trusting your instinct (& stop overriding it!)
- Know what to look for to help avoid danger
- Know how to respond to keep an uncomfortable situation from turning into a dangerous one.
- Use methods for discouraging an attack

Being prepared, using awareness strategies, and knowing you have options for how to prevent violence will give you the confidence to go about your days with less fear and less stress.

The seminar utilizes real-world stories, practice scenarios, and discussion.

Instructor: Dawn Armstrong

Founder of ThinkSafe Seminars, Dawn Armstrong recognized that a lack of situational awareness was contributing to people getting hurt, and even killed. Dawn drew from her early experiences living and traveling as a single woman and combined those life lessons with research, training with security professionals, and the knowledge gained from a life-long passion for the martial arts.
Dawn’s seminars support people and organizations concerned about personal safety. Her goal is to help people live with more confidence, and less fear, by increasing situational awareness, improving conflict management, and utilizing "Stun & Run" physical defenses when necessary.

An Introduction to Medical Intuition

Subject Area: Health/Wellness

Thursdays: Single Session 1:00 PM - 2:30 PM   Start: Thu 6/17/21   End: Thu 6/17/21
Location: Online Zoom Offering  Class Size: 250

Course Description
Medical Intuition is a system of expanded perception gained through developing the human sense of intuition. Considered within the emerging field of Complementary and Alternative Medicine (CAM), Medical Intuition focuses on pinpoint visualization skills and in-depth intuitive scanning to obtain information from the physical body and energy systems.

The intention of Medical Intuition is to identify energetic patterns that correspond to illness, imbalance, and disease. It is also designed to address the influence of thoughts, beliefs, and emotions, and how they impact the health and well-being of an individual.

A typical session starts with viewing and describing one or more areas of concern with the client's health. This begins with looking at the physical body and then progresses to energetic structures such as blocked energy flow, possible inflammation, congestion and more. An example of this is a heart condition where the Medical Intuitive views the client's physical heart, then looks at heart function, the circulatory system as a whole, and perhaps hones into a specific area that expresses an issue.

Because the "viewing" is done via intuition, sessions can be performed over distance by phone, internet platforms (such as Zoom), or in person.

Medical Intuition is a valuable tool whereby underlying issues can be discovered that testing may never find, thus saving the client time, expense, and discomfort.

Medical Intuition is not to be construed as medical or psychological advice and is not to be considered a replacement for medical care, medical diagnosis, therapy, counseling or treatment of any kind.

Instructor: Danielle Dvorak

Danielle Dvorak is a lifelong intuitive, energy worker, classical musician, visual artist and more. She is Certified in Medical Intuition, Tibetan Sound Healing, Yoga, Aromatherapy, as an End of Life Mentor, and is also an Usui Reiki Master Teacher and Akashic Records guide.

Other unique aspects of Dvorak's life experience include: a Buddhist pilgrimage through Tibet, working as a "Ghost Buster," a 40-year meditation practice, auto racing for 25 years, and sitting a 10-day Vipassana course with six to 10 hours of meditation per day. She brings the depth of these experiences into her work and teaching.
