Research has confirmed that just one positive adult relationship changes a child's outcome dramatically thus providing for a brighter future. We know that every child in foster care deserves a Court Appointed Special Advocate (CASA) volunteer but unfortunately, not everyone will be lucky enough to have one. CASA Volunteers are everyday people who are doing extraordinary things to help change a child's story. In this class, participants will learn about the realities of the child welfare system and the health, safety, and resiliency of children and their families. Explore the potential of helping change a child's story!

How were these vaccines developed so quickly? What are the prospects for long-term avoidance of COVID-19 with these vaccines? How have evolving and revolutionary medical science techniques helped with this pandemic? What does examination of the current data help to understand what mistakes have been made, what successes have been achieved, and how proper planning and preventive measures can help us all avoid significant problems with certain new disease outbreaks in the future. Course Description
There's a lot of wisdom gained by many people gained from decades of accumulated practical experience (school of hard and soft knocks and feints). It could be about sharing simple tools and techniques of weeding, making coffee, washing dishes, shaving, etc. These are not closely guarded secrets but probably habits picked up casually but ritualized through habits but not well known outside your household. Would be interesting to learn how someone else acquired some useful hack for life and incorporated it into their ordinary life. This is not about some grand philosophy or viewpoint about life, but simple, concrete stuff.

In the following four sessions, we will look at defined processes for overcoming those biases to set priorities, make decisions, solve problems, and execute plans. For these processes, we will look to the work of Charles Kepner and Benjamin Tregoe. My objective is to help participants to be more conscious of their biases and to provide some simple tools for better thinking.

Truth is the Daughter of Time. Readers who have not yet encountered Josephine Tey are in for a treat. Here, she tasks her intuitive detective, Alan Grant, to take a second look at Shakespeare's quintessential villain, Richard III, and to apply his detection skills to an actual person of history, known mainly from his treatment as a character in the fictional play, and compare historical documents of the actual period when Richard lived and died. We will read the book, and discuss his conclusions. Reading the Book - "The Daughter of Time" by Josephine Tey - is required for the class. Available on Amazon in a variety of formats. Katie Jenkins has been with the campaign for the Ballot Initiative with Pima County Justice For All for the last year. She does everything from emails, to organizing events, setting up meetings for Margo Cowan to present, and all around assistance to the campaign.

**Advance Directives, Informed Consent, And Medical Aid in Dying**

**Start:** Wed 7/28/21  
**End:** Wed 7/28/21

**Location:** Online Zoom Offering  
**Class Size:** 30

**Course Description**

Patients have the right to make medical and legal decisions for themselves, provided they are of legal age and of sound mind, i.e., they have legal capacity, and they are giving informed consent. But what constitutes informed consent? When a patient's capacity or mental acuity declines because of age, mental infirmity, or a critical illness, doctors may look to others to make medical and financial decisions for the patient. Sometimes they rely on a designated agent or family member, even when a patient is able to consent to treatment. When must the healthcare team rely solely on the patient? When may it rely on another to make healthcare or other decisions? When may the healthcare team or a medical proxy terminate care or treatment? Can you ask your doctor to help end your life if you have a terminal illness?

Location: Online Zoom Offering Class Size: 40

Course Description
Elder Abuse and Fraud: How To Avoid Being Victimized

In March 2019, the United States Department of Justice coordinated multiple law enforcement offices to tackle the growing problem of elder fraud schemes. More than 2 million, mostly "elderly," Americans fell victim to schemes masterminded by more than 260 defendants from around the world, amounting to over $750,000,000 in losses to unwitting elders. Most of these fraudulent schemes fall under the general category of "consumer fraud," such as when someone tries to steal your identity, your money, your credit card or bank account numbers, forges checks, or is involved in a "Ponzi" or pyramid-type scheme. But other schemes may target your hearts and confidence.

Approximately one in 10 Americans over 60 has fallen victim to elder abuse, but only one in 24 cases gets reported. Elders and other vulnerable adults are particularly susceptible to schemers and thieves but often feel embarrassed when they are taken in by fraudsters and fail or refuse to report. Similarly, elders who rely on others for care, comfort, or company may be reluctant to report abuse, fearing they may lose their lifelines or their caregivers if they do so.

This presentation will focus on current schemes and themes fraudsters use, and tips to prevent becoming a victim. Additionally, we will discuss what constitutes abuse and how to recognize it when it's occurring, whether in your own home or elsewhere. Finally, we will provide resources to access help if you or others fall victim to either fraud or abuse.

Why did mathematicians begin studying spaces having more than three dimensions? What are the properties of such a space? Can our universe be embedded in one? Infinite dimensional spaces entered mathematics about 1900 and now one class, Hilbert spaces, play a fundamental role in quantum mechanics. Where did these spaces come from? We will explore these questions in this class. Some formulas will be shown, but their meaning will be made clear and they shouldn't trouble anyone.

**Course Description**

Admiral Rickover - controversial genius, technical genius, brilliant entrepreneur, father of naval nuclear propulsion, father of the nuclear power industry. A Steve Jobs, Jeff Bezos, Elon Musk? Or "Most famous and controversial admiral of his era?" Hyperactive, blunt, confrontational, insulting, workaholic, demanding of others regardless of rank or position. Considered a tyrant by many.

Admiral Rickover, in 7 years, conceived and managed the design, building, testing, and the 1954 launch of the first nuclear powered submarine - the Nautilus. Nautilus traveled at an underwater speed of 20 knots, could
remain submerged for weeks, made numerous trips under polar ice caps, and traveled over 500,000 miles. Today there are 325 nuclear powered naval ships and 450 nuclear reactors that generate 20% of the electrical power consumed in the world.

One of four people to hold two presidential gold metals, Admiral Rickover was featured in Time Magazine 36 times, served in the Navy for a record 63 years under 13 presidents, and his 1982 retirement party was attended by 3 presidents. Disliked intensely by most branches of the Navy and passed over three times for promotion in an attempt to force him out of the Navy. Congress and White House intervention saved his career and the nuclear navy. How did Rickover survive and thrive in such a hostile environment he helped create? SGL Gerald Geise spent years working with Admiral Rickover as a supplier of Nuclear Reactors for naval ships. Join Gerald for an interesting, sometimes serious, sometimes humorous, look at the life and times of Admiral Rickover.

Instructor: Gerald Geise

Gerald Geise is a Chemical Engineering graduate from Montana State University. He spent 25 years in the nuclear industry field with General Electric and United Nuclear in increasingly responsible engineering and management positions. Those include being the operations manager for Hanford, Washington nuclear reactors producing Plutonium for nuclear weapons, and the operations manager for the largest dual-purpose Plutonium and electrical generation nuclear reactor. He was also president of a United Nuclear division that manufactured nuclear reactors for the US Navy. He also has an extensive public speaking background on the risks and benefits of nuclear power.

An Introduction to Medical Intuition

Subject Area: Health/Wellness

Thursdays: Single Session1 Sessions 1:00 PM - 2:30 PM Start: Thu 8/5/21 End: Thu 8/5/21

Location: Online Zoom Offering Class Size: 300

Course Description

Medical Intuition is a system of expanded perception gained through developing the human sense of intuition. Considered within the emerging field of Complementary and Alternative Medicine (CAM), Medical Intuition focuses on pinpoint visualization skills and in-depth intuitive scanning to obtain information from the physical body and energy systems. The intention of Medical Intuition is to identify energetic patterns that correspond to illness, imbalance, and disease. It is also designed to address the influence of thoughts, beliefs, and emotions - and how they impact the health and well-being of an individual.

A typical session starts with viewing and describing one or more areas of concern with the client's health. This begins with looking at the physical body and then progresses to energetic structures such as blocked energy flow, possible inflammation, congestion and more. An example of this is a heart condition where the Medical Intuitive views the client's physical heart, then looks at heart function, the circulatory system as a whole, and perhaps hones into a specific area that expresses an issue. Because the "viewing" is done via intuition, sessions can be performed over distance by phone, internet platforms (such as zoom), or in person.
Medical Intuition is a valuable tool whereby underlying issues can be discovered that testing may never find, thus saving the client time, expense, and discomfort. Medical Intuition is not to be construed as medical or psychological advice and is not to be considered a replacement for medical care, medical diagnosis, therapy, counseling or treatment of any kind.

Instructor: Danielle Dvorak

Danielle Dvorak is a lifelong intuitive, energy worker, classical musician, visual artist and more. She is Certified in Medical Intuition, Tibetan Sound Healing, Yoga, Aromatherapy, as an End of Life Mentor, and is also an Usui Reiki Master Teacher and Akashic Records guide. Other unique aspects of Dvorak's life experience include: a Buddhist pilgrimage through Tibet, working as a "Ghost Buster,” a 40-year meditation practice, auto racing for 25 years, and sitting a 10-day Vipassana course with six to 10 hours of meditation per day. She brings the depth of these experiences into her work and teaching.

Course Description
Ancient Indian petroglyphs (symbols carved or pecked on rocks) and pictographs (rock paintings) are claimed by some to be forms of writing for which meanings are known. But are such claims supported by archaeology or by Native Americans? Archaeologist Allen Dart illustrates how petroglyph and pictograph styles changed through time and over different parts of the U.S. Southwest both before and after non-Indian peoples entered the region, and discusses how even the same rock art symbol may be interpreted differently from popular, scientific, and modern Native American perspectives.

Al Dart, an OLLI study group leader since 2012, is the executive director of Tucson's nonprofit Old Pueblo Archaeology Center. He has worked as a professional archaeologist in Arizona and New Mexico since 1975 for federal and state governments, private companies, and nonprofit organizations. Al has received the Arizona Archaeological Society's Professional Archaeologist of the Year Award, the Arizona Archaeological and Historical Society's Victor R.
